NAVARRETE FABRICATION

CAPABILITY STATEMENT

Greater Toronto Area, Ontario, Canada

navarretefabrication.com

PRECISION POWER COMPONENTS. BUILT TO PRINT.

Build-to-print electrical and precision components backed by 20 years of hands-on experience in electrical and power-component manufacturing, including transformers, coils, busbars and power equipment.

COMPANY OVERVIEW

Navarrete Fabrication is establishing production capacity to support manufacturers of transformers, switchgear, coils, data-centre power equipment, power distribution equipment and control panels.

FOUNDER EXPERIENCE

- Manual machining and CNC production operation
- Milling, drilling, saw cutting, punching, notching and slotting
- Cassette loading, gantry material handling, and tool/offset adjustment
- Busbar and terminal fabrication from raw stock through dimensional inspection
- Deburring, fitting, assembly and production/shop-order loading

PRODUCT FOCUS

- Busbar and interconnection components
- Electrical terminals and terminal plates
- Adapter plates and mounting plates
- Angle connectors

MANUFACTURING EXPERIENCE

- CNC production operation
- Milling, drilling, saw cutting, punching, notching and slotting
- Deburring, fitting and assembly
- Dimensional inspection and material traceability
- Prototype, small-batch, overflow and rush-support discussions

MATERIALS

Aluminum fabrication experience includes 3/8, 1/2, 3/4 and 1 inch stock. Material grade, temper and availability are confirmed for each RFQ. Copper and other customer-specified materials may be considered after reviewing the drawing, material specifications, production capability and inspection requirements.

INDUSTRIES

Data Centres | Transformers | Switchgear | Coils & Reactors | Power Distribution | Control Panels

QUALITY STATUS

Navarrete Fabrication is implementing documented quality controls aligned with ISO 9001 principles in preparation for future certification. The company is not currently ISO 9001 certified.
